An advanced **clear aligner system**

Your smile is our priority, which is why Invisalign Go™ clear aligners are created using the high quality, proprietary SmartTrack™ material. Not all clear aligners are alike. Only Invisalign® and Invisalign Go Portfolio clear aligners are made of SmartTrack material, making it one of the most advanced clear aligner systems in the world.

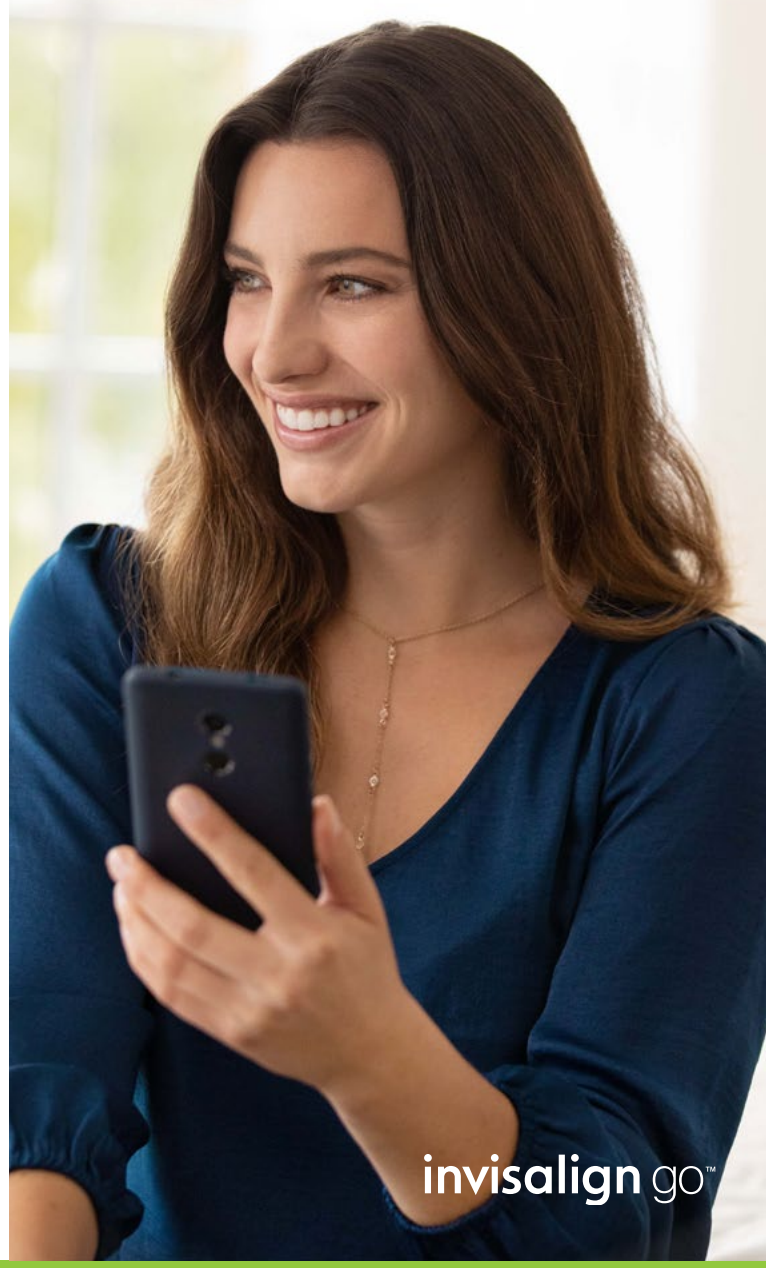
invis is a trusted smile.



invisalign go™

Invisalign Go™ transforms your smile with the brand trusted by **over 17 million** patients worldwide.[1]

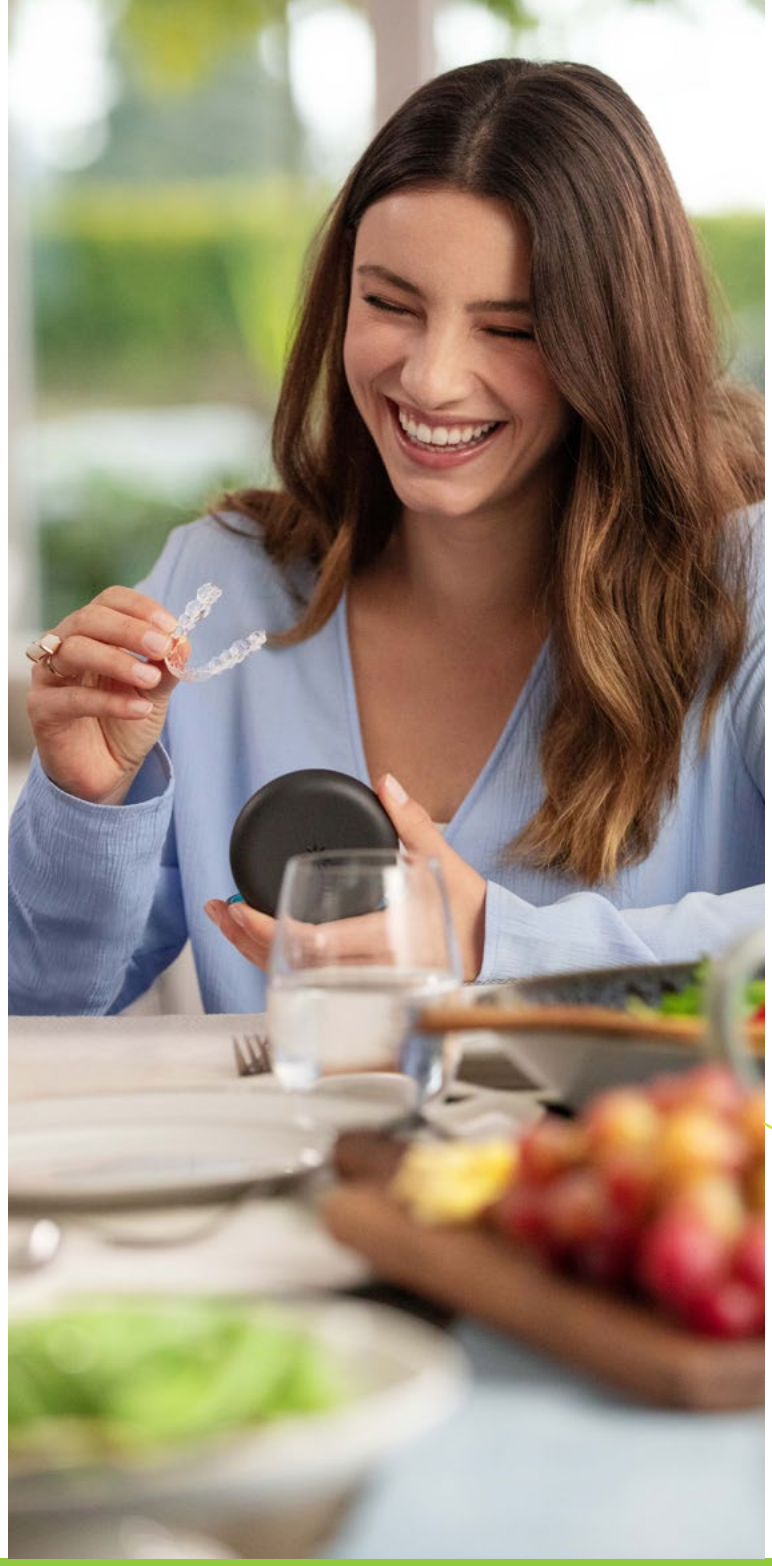
Works fast
The results you want, in as little as 6 months.[2]

Affordable
Shorter treatment time that focuses on your front teeth means a more affordable option.

Face-to-face doctor care
Your Invisalign Go™ trained doctor will closely monitor your progress throughout your Invisalign Go treatment.

Better results
You get a customised treatment based on years of research from millions of patients worldwide.[1]

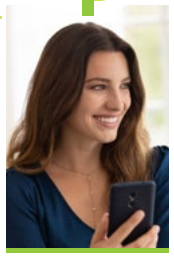
1. Data on file at Align Technology, as of December 31, 2023.
2. Data on file at Align Technology, as of September 9, 2020. Based on mild to moderate malocclusion (defined as crowding and spacing up to 6mm, and overjet and overbite up to 6mm and assuming one week wear), treatment times vary depending on Invisalign product type, wear time, case complexity and must be determined by your doctor.



How does it work?

01 Meet with your doctor for a comprehensive consultation
Before starting your Invisalign Go™ treatment, your doctor will discuss your desired outcome and show you a simulation of what you could look like after Invisalign Go treatment using the Invisalign SmileView™ tool.

A record of your teeth will be taken using an intraoral scanner or a PVS impression. Your doctor will then map out a customised treatment plan just for you.

02 Start transforming your smile
Right from the start, your doctor will ensure your aligners fit well, answer your questions, and let you know what to expect.


03 Keep your brand-new smile beautiful
You transformed your smile with one of the world's most advanced clear aligner systems. Now it's easy to keep the smile you love with our Vivera™ retainers.
